What's one thing you love about libraries?
In typical times, how often do you visit a library?

- At least once per week: 27
- At least once per month: 24
- At least once per year: 4
- I rarely visit libraries: 1
When you think about your needs and your community’s needs, what do you like about a RENOVATED library?

- That it maintains the important sense of place in the community.
- Investment in our neighborhood.
- Retain character.
- Sharing history with my children.
- Preservation of the historic integrity of the existing building while adding needed updates.
- Possibly lower carbon impact compared to a new build.
- Keeping with the neighborhood feel.

When you think about your needs and your community’s needs, what do you like about a RENOVATED library?
When you think about your needs and your community’s needs, what do you like about a RENOVATED library?

- More space for one on one meetings
- Preserving the history of this building, which the community fought for over many generations
- Preserve the character of the current building exterior
- Excited for a play area
- Beautiful architecture that deserves to be preserved.
- A kids playroom
- Feels familiar
- Maintains the ONLY Hale library left in the city
- A fresh, safe, accessible space that is beloved by the community

When you think about your needs and your community’s needs, what do you like about a RENOVATED library?

- I would like it to reflect the style of the neighborhood.
- Aspects the history of the community raising money for this building.
- Fit in the neighborhood (vs. modern building).
- My needs - keeps from breaking my heart and my kid’s heart. My community: keep historical integrity of neighborhood HM intact as we face teardowns all around us.
- Little nooks.
- Possibility of more useable lawn area.
- The pollinator garden.
- Preserves look and feel while providing needed updates.
- I like that updates for ADA needs, maintaining character, improving might be better than new updates. I love this library, am aware of its flaws, but think it can be updated.
When you think about your needs and your community’s needs, what do you like about a RENOVATED library?

- Maintains large meeting room and auditorium
- Maintain a library that fits the time period of the community, especially one as well aged and bound by architecture as the midway. I would like to see it as a model for for making old buildings ADA compliant and as energy efficient as possible.
- Possibly a more environmentally-friendly option to make it more accessible.
- coziness
- renovation is sustainable!!
- Maintenance the only ‘attractive’ building in the neighborhood. This building was built during the Great Depression, and is an example of the tenacity of this neighborhood.
- Looks interesting rather than bland
- Combine the old with the new.
- It’s an historic building in a historic neighborhood.
When you think about your needs and your community’s needs, what do you like about a RENOVATED library?

- Lots of evidence for sustainability of renovation.
- I love the historic part of the neighborhood and building. Also shorter time without a space/library. Recycle/reuse. Less Wasteful.
- Homey, classic, familiar, nook-like.
- Shows unique neighborhood history.
- Older buildings can be made accessible - it happens all the time.
- This historic stage could have some great uses.
- I am realizing that a renovated library doesn’t meet my hopes and desires for our library.
- Keeping the character of the neighborhood.
- Although small it has quiet acoustics. Some new libraries are loud and echo-y (i.e. Roseville Library).
When you think about your needs and your community’s needs, what do you like about a RENOVATED library?

- Invites those with disabilities and access needs throughout their lifetime.
- Outdoor program options
- facade feels important to telling the story of the neighborhood
- more possibilities for modern technology / meeting spaces
- A more useful basement?
- Preserve Architecture History
- theater space available
- New architecture in our neighborhood is very ugly- the new apt buildings and other ugly new buildings- maintain the integrity of the old building with good new improvements.
- It has a great history that should be remembered and celebrated
When you think about your needs and your community’s needs, what do you like about a RENOVATED library?

- Less time without the library available
- The intimate space makes it easy to connect with other users.
- The classic feel needs to be maintained.
- Preserving a beautiful building.
- Building aesthetics are individual preferences. :)
- Roseville library example of how rebuild took any charm or appeal away from library experience.
- Familiar space with new and functional for all people
- Renovating the library means being able to keep an eye on kids while also looking for adult books.
- We lost the 100 year old pharmacy next door. Don’t want to loose more character of the neighborhood.
When you think about your needs and your community’s needs, what do you like about a RENOVATED library?

- Not limited by current footprint; allows imagination to run wild
- The availability of small work rooms.
- Not limited by current footprint; allows imagination to run wild
- Increased, varied range of functions
- ACCESSIBILITY!
- more room!
- ADA access
- Physical accessibility.
- Better bathrooms, larger collections.

<td>A building that doesn’t require folks with assisted mobility devices to use only the back door</td>
</tr>
</tbody>
</table>
When you think about your needs and your community’s needs, what do you like about a RENOVATED library?

- Tutoring space that connects volunteers and mentors with students and families who need it.
- Hopefully room for a children’s story time that isn’t in a regularly flooding space!
- Connecting resources to neighbors more easily.
- Separate spaces for folks who come to read/work and folks who come to play/take advantage of programming/group times.
- The biggest advantages of a rebuild are major leap forward in energy system and long-term durability. I think a multi-story new building should be on table.
- Better restrooms & bigger collections & books.
- A building that represents a new chapter of HM history.
- Meeting rooms to expand the offerings of the library to folks who currently can’t don’t use it.
- I like ADA accessibility, greener. Concerned about losing the historical building.
When you think about your needs and your community’s needs, what do you like about a RENOVATED library?

- Still keeping a cozy space around a fireplace; a quiet reading area with comfy chairs. Fun nooks for children to sit and read or places to read with children. Expanded place to share community resources. Homey feel not all glass and metal.

- I second better working environment for librarians re: bathroom safety issues and flooding basement auditorium

- A quiet room is a wonderful addition that seems to be more feasible with a new building.

- The location is a good one-off of bus lines and easily accessible.

- Many of the issues with the current building show issues with deferred maintenance. How would new construction ensure that this does not occur?

- Including place to display community art, photographs, information about community’s history and people.

- I like the one-story design- cannot stress enough how much an issue the two separate entrances are for folks who use wheels to get around, including families with strollers, and having the bathrooms on a separate level is also a very large challenge!

- Don’t lose the focus on books. Let’s serve other needs, but can’t leave books behind.

- More space- wow!!! More space could mean more people using the space!
When you think about your needs and your community’s needs, what do you like about a RENOVATED library?

I like the idea of honoring the current library through photos, mementos, and artifacts, inside of a new building.

With more than one story could possibly have parking “under” like the Saint Paul Trader Joes.

This seems to be a building that could serve more generations, more people, and people with different abilities and of all cultures.

Not having stairs is lovely!

Preserving and respecting the historical integrity of the buildings and style of this neighborhood.

Creative approaches to the character of the building to update to accommodate the needs of the present generation. It is how we all adjust to living in our houses built with the same historical character and while updating to our lifestyles.
When you think about your needs and your community’s needs, what do you like about a NEW library?

- More space
- Teen activities
- I love the idea of a truly green building
- bigger space
- Serving everyone
- Meeting spaces
- Shows city commitment to neighborhood
- greater ADA accessibility
- Seems to help us achieve the mission of the library more
When you think about your needs and your community’s needs, what do you like about a NEW library?

- intentional teen space
- flexible meeting space with current technology
- Possibly a recording space for music programs!
- Let’s build a new library at a different location and preserve the old one.
- Energy efficient and environmentally friendly
- space for teens
- I think a new building would serve NEXT generation
- Space for a noisy area
- more welcoming to more types of users
When you think about your needs and your community’s needs, what do you like about a NEW library?

- Maybe a community kitchen?
- More space to really allow for community building
- More space serving everyone
- high sustainability standards
- Real city investment in H-M neighborhood
- More possibilities. Not hemmed in
- Potential for environmentally friendly building.
- embody "funky urban" living
- Our neighborhood is and will continue to grow, we should build a library to meet that growth -- especially for teens who might want more than 8X10 square feet.
When you think about your needs and your community's needs, what do you like about a NEW library?

- Better accessibility and meeting space flexibility. I know the current meeting space was often very booked up.
- Working space and will serve younger patrons better
- More spaces
- Maybe a small food shelf space
- Better long-term CO2 footprint, larger/better space for youth & community
- Better utilized space. Greener.
- Study spaces/rooms
- Possibility of space for after-hours use
- Flexibility with small study rooms and community rooms
When you think about your needs and your community’s needs, what do you like about a NEW library?

- More welcoming space for all residents
- A larger space to serve our growing community as we welcome more neighbors
- Please don’t tear down this building.
- Being able to design it for today’s community. To ensure the ability to welcome all families and children and maintain age appropriate expectations.
- The ability to create a space reflective of the community it serves.
- A blank slate for new and expanded uses
- More possibilities
- Community gathering spaces, flexible
- I like the possible energy efficiency, and accessibility. However applying this too an old building may be a better community learning experience for our 100+ year old homes and businesses.
<table>
<thead>
<tr>
<th>Accessibility is part of the design, rather than an addition</th>
</tr>
</thead>
<tbody>
<tr>
<td>Please explain why you're not considering to build elsewhere.</td>
</tr>
<tr>
<td>A library of the future that will focus less on books and more on services, community, opportunities to meet</td>
</tr>
<tr>
<td>Accessibility for all.</td>
</tr>
<tr>
<td>More contemporary way to realize the full potential of a public library - books, community space, all ages, accessible, green, aspirational.</td>
</tr>
<tr>
<td>Safer feel for staff not having to manage two stories.</td>
</tr>
<tr>
<td>Potential to be more appealing to teens</td>
</tr>
<tr>
<td>College students I teach can't get to remote class (Zoom) because their tech works out. That hurts poor kids. If a library can complete tech gap, provide remote classrooms, do it. Save facade and build bigger, better. Ignore us olds. Build for kids!</td>
</tr>
<tr>
<td>It would be bigger, potentially a green building, more accessibility. The chance to start from a clean slate is exciting. The neighborhood will definitely use this facility just like they use the current one.</td>
</tr>
</tbody>
</table>
When you think about your needs and your community’s needs, what do you like about a NEW library?

Integrating the classic features in a new rendition: keep those beautiful windows, for example.

Flexible form to adjust to interests/needs of community over time so we don't have to do this again in 20 years.

Only 1 floor?? would welcome more than one floor!!!!!

This seems like a remarkable opportunity to create a Midway Community Hub that would integrate Hancock Rec, Hamline Midway Library, and Hamline Elementary. All three are in need up substantial updates.

Better ADA access.

Useful auditorium space.

Love the idea of designing our future library as a neighborhood to meet our vision for the future.

As a teen, I had access to a teen lounge in a small inner ring suburb and it changed my feeling of belonging. We should support youth like that in the Midway too.

More computers for those who don't have access at home.
When you think about your needs and your community’s needs, what do you like about a NEW library?

- Investment in an important neighborhood that anchors our city.
- Design that will better reflect diversity of our communities.
- We need more places where people can bring portable devices for remote work without paying to do so.
- better facility for greener community
- commitment to neighborhood/area
- A new building would be a point of pride for this neighborhood in the way that the current library has been for so long.
- Meeting rooms available for the community
- place could embody cross cultural designs
- possibility for partnerships/shared management of space?
When you think about your needs and your community’s needs, what do you like about a NEW library?

- Replacing the current building with a low-slung 1 story box would be devastating. There is nothing we can accomplish with a new building that we can’t get to with a renovation.

- I like it only if we maintain the classical feel. The pictures shown do not fit this feel. Don’t build a box.

- Whatever we decide, the decision needs to be made for the people who live in this neighborhood and who will actually use this library - not for aspirational future visitors who don’t live here and may never live here.

- I think a tear down is a much better option

- Demonstration possibilities of energy efficiency, solar, etc.

- Curious why and who made the decision to limit the library investment to this site -- reaction to someone’s comment about investment at Hancock Rec also.

- Solar panels

- I like the idea of a library that integrates and tells the story of how our community fought for our library, and that is open to the next generations of users with more design choices that reflect diversity

- Theater space/stage space would be a lovely space to replicate
When you think about your needs and your community’s needs, what do you like about a NEW library?

- I would love for young people to see the City invest in them with a new building in their neighborhood/community.
- The current library serves young kids and adults well, teens and young adults are not well served.
- Like the ADA accessibility, greener, community kitchen and food distribution are appealing. Concerned about the loss of building.
- Better working environment for librarians
- More workspace.
- I am okay with a more modern design
- Possibility of a net zero design
- Improved meeting spaces.
- Better accessibility
When you think about your needs and your community’s needs, what do you like about a NEW library?

- more comfy & modern
- dedicated quiet space
- a design for possible build “upwards”
- a space that could have a larger collection of books
- could be a demonstration for placemaking
- think big!!

I love the idea of a library that integrates youth really significantly in planning and design choices and gives them a sense of ownership.

I like investing in the neighborhood.

This would be such a blow to the neighborhood. Remember too that this is occurring across from Hamline University which has torn down a lot of the houses in the neighborhood. This is another blow.
When you think about your needs and your community’s needs, what do you like about a NEW library?

A “radical renovation” is a third option not presented – preserve the ext shell (and its huge amount of embodied carbon) while adding a modern addition to capture more of the site, add universal design components, etc. – and set a huge example!
Menti ranked choice question

When you think about your needs and your community's needs, rank your priorities for the Hamline Midway Library:

1st: Climate-friendly, energy-efficient building
2nd: Preservation of current building
3rd: Individual rooms to study or work
4th: Space for community meetings and creative programming
5th: Fireplace
6th: Dedicated 'quiet room' or reading room
7th: Safety and security
8th: Outdoor green space
9th: Natural light
10th: Other
11th: Teen space
12th: Accessibility for those with mobility challenges
